## Product Details

- Allows Stacking of 3 or 5 Filters
- Black Anodized Aluminum
- Posts and Post Holders Required for Mounting

Fixed/Multiple Filter MOUNTS are ideal for use with neutral density filters in stacking applications. Mounting cell holds filter with diameter "F" in place with a retainer ring. Mounting cell sits securely in filter holder. Fixed/Multiple Filter MOUNTS can also hold unmounted filters with diameter "A". A filter holder and filter cell are required for a complete stacking system, such as the one illustrated in the product image. These mounts are constructed of black anodized aluminum and are optimal for mounting 3 or 5 circular optics.

Posts and Post Holders are required for mounting to a breadboard.

## Technical Information

| Stock No. | A    | B    | C    | D   | No. of Slots | No. of Cell Slots |
