## Product Details

- Narrow 0.07nm FWHM Spectral Linewidth
- Extreme Temperature Insensitivity
- Ultra-Compact, Easy-to-Use Turnkey Laser System

Coherent® Surelock™ Mini-Benchtop Laser Systems provide temperature stabilized, narrow 0.07nm FWHM spectral linewidth laser output with powers up to <500mW. Featuring integrated current and temperature control, these lasers provide better than 1% power stability, <1 minute warm-up time, and extreme temperature insensitivity for consistent performance over the locked region. A convenient LCD touchscreen display allows for easy setup, output power adjustment, and integration into new and existing lab and OEM systems. Coherent® Surelock™ Mini-Benchtop Laser Systems are ideal for a range of precision applications including Raman Spectroscopy, Metrology, Bio-Instrumentation, Sensing, and Analytical Instrumentation. These lasers can be operated standalone or with a computer using the built in USB port which allows for a wide range of programming languages via serial commands.
