#### General

Linear Polarizer **Type:**

#### Physical & Mechanical Properties

12.7 **Clear Aperture CA (mm):**

25.40 **Diameter (mm):**

**Length (mm):**

**Construction:**

Crystalline Glan-Taylor Polarizer

**Optical Properties****Coating:**Single Layer MgF<sub>2</sub>**Extinction Ratio:**<5 x 10<sup>-5</sup>**Substrate:** 

Calcite

**Surface Quality:**

20-10

**Transmitted Wavefront, P-V:** $\lambda/2$  @ 632.8nm**Beam Deviation (arcmin):**

&lt;3

**Transmitted Wavefront Distortion (RMS):** $\lambda/4$  @ 632.8 nm**Wavelength Range (nm):**

350 - 2300

**Damage Threshold, By Design:** 2 J/cm<sup>2</sup> @ 1064nm, 10ns, 10Hz**Regulatory Compliance****RoHS 2015:****Compliant****Certificate of Conformance:****View****Reach 247:****Compliant****Product Details**

- High Extinction Ratios up to 200 000:1
- High Laser Damage Thresholds up to 5 J/cm<sup>2</sup> @ 1064nm

Glan-Type Polarizers are mounted, polarizing prisms used in applications that require broad spectral ranges, high extinction ratios, or high polarization purities. Glan-Taylor Polarizers are medium-power, air-spaced UV to NIR polarizers that transmit the extraordinary beam. The ordinary beam is then reflected and absorbed by black glass plates that have been cemented to the prism. Glan-Laser Polarizers are similar to Glan-Taylor, but are designed for higher power applications and appropriate for use in Q-switched laser cavities. Glan-Laser Polarizers utilize an advanced polishing technique for minimizing surface scatter and feature two escape windows for passing the high power rejected light. Glan-Thompson Polarizers are low power polarizers that are ideal for UV, visible, or NIR applications, feature a cemented design, and transmit the extraordinary beam while absorbing the reflected ordinary beam.
