Sill Optics Multispectral F-Theta Lenses are high quality lenses that are ideal agricultural inspection, confocal microscopy, and environmental research applications. This F-Theta Lens offers a focal length of 163mm, and a large scan field of 102mm (X) x 102mm (Y). Corrected for Nd:YAG fundamental wavelength of 1064nm and the second harmonic wavelength for 532nm, this lens features a common mounting thread for easy integration into galvo systems. Sill Optics Multispectral F-Theta Lenses feature a high damage threshold of 2.5 J/cm² (1ns, 50Hz) for pulsed lasers and 2.5 MW/cm² for continuous wave (CW) lasers.
