Product Details

- Automated Motion Without Programming
- RS-232 Interface
- Control Up to 4 Axes of Movement
- C/C++/LabVIEW™ Compatible

The MC-CQ Motion controller delivers state of the art control of your motorized stages. The controller is operated via an RS-232 connection to your PC and provides velocity and position control with programmable speed and acceleration. Clean and simple connectivity facilitate rapid deployment. An optional plug-and-play USB to 4-port serial converter is available for multi-axis applications requiring more serial ports than are available on your PC.
